

DIGITAL TORQUE MULTIPLIER

- The new innovated digital torque multiplier will help users to fasten large fasteners more efficiently than before.
- Big LCD screen displays the output torque value directly, and by pressing buttons, it is easy to convert units among Nm, lbf-ft, lbf-in, and kg-m.
- Forging steel case and attractive metal cover protect the inside gears and electronic parts from any possible impacting or breakings while working.
- It is very easy to learn and operate the digital torque multiplier by six buttons.
- The red led light and loud buzzer will alarm user while applying torque.
- Pressing ▲ button and ▼ button to adjust the desired target torque value.
- Users can use the common ratchet handle on the digital torque multiplier.
- Torque range: 1500Nm , 2000Nm, and 3000Nm with CW±2% (F.S) and CCW±3% (F.S), and larger torque ranges are launched soon.
- The reaction arm is included.
- It is prohibited to have power tools and torque wrenches on digital torque multiplier!!

Before, worse! (Accuracy ≥ 8%)

Now and Future, Best! (Accuracy ≤ 2%)

P.A.T

	Torque Value	Input Driver	Output Driver	Ratio
DG®-II 11060338	1500Nm	1/2"	3/4"	1: 5
DG®-II 11060339	2000Nm	3/4"	1"	1: 5
DG®-II 11060340	3000Nm	3/4"	1"	1: 5
