

# Combustion Chamber Cleaning Machine Series

## Two Functions Oil Extracting Draining & Combustion Chamber Cleaning

### Features:

- Carbon removing cleaner is stored in a 2L stainless steel tank next to a 10L, 40L or 80L tank.
- A special designed device is used to produce foam so as to avoid this can product being discarded after use. It is both environmental protective and economic.
- The foam can extend the washing time and soakingtime so that every corner of the combustion room, branch pipes etc.. can be cleaned.

Gross Weight	9	27	28	33	34	27/4	28/4	34/4	35/4	

# The red pressure tank is 2L and stainless steel material.

# Engine Flushing Machine

## "Try The Easiest And Efficiency Way Of Maintaining The Car Engine"

### Engine Flushing Cleaner • HW-350

- A quick clean on residual sludge and engine deposits. Settling throughout the engine, sludge will clog oil passages, restricting the flow of oil to vital engine parts. A clean engine performs better and lasts longer.
- This product is made with hydrocarbon. It causes no harm to the ozonosphere. Its an Environment friendly cleansing product, which also prevents rusting.
- Qualified by S.G .S. as an Environment friendly product. Not include heavy metals.

### Engine Flushing Machine • HW-25NF

- Simply connected the suction tube with the opening of the oil-gaging or oil drain plug. Then connected the filling tube to the opening of the engine oil tank.
- One machine works with double Functions- both ways of suction and flushing.
- Simply adjust the air pressure for the best result of flushing effect.
- Flushing process can be done on either moving engine or static engine.
- Easy connect adaptor set fit on any types of cars.

• HW-25NF

Model	HW-25NF	HW-350
Used Pressure	5~7kg/cm <sup>2</sup>	
Power	AP-35 Pneumatic motor	
Machine Size	520x520x850	Q' TY. :24 CANS
Packaging	7.2'	0.6'
Net Weight	27	7.8
Gross Weight	28	8.8

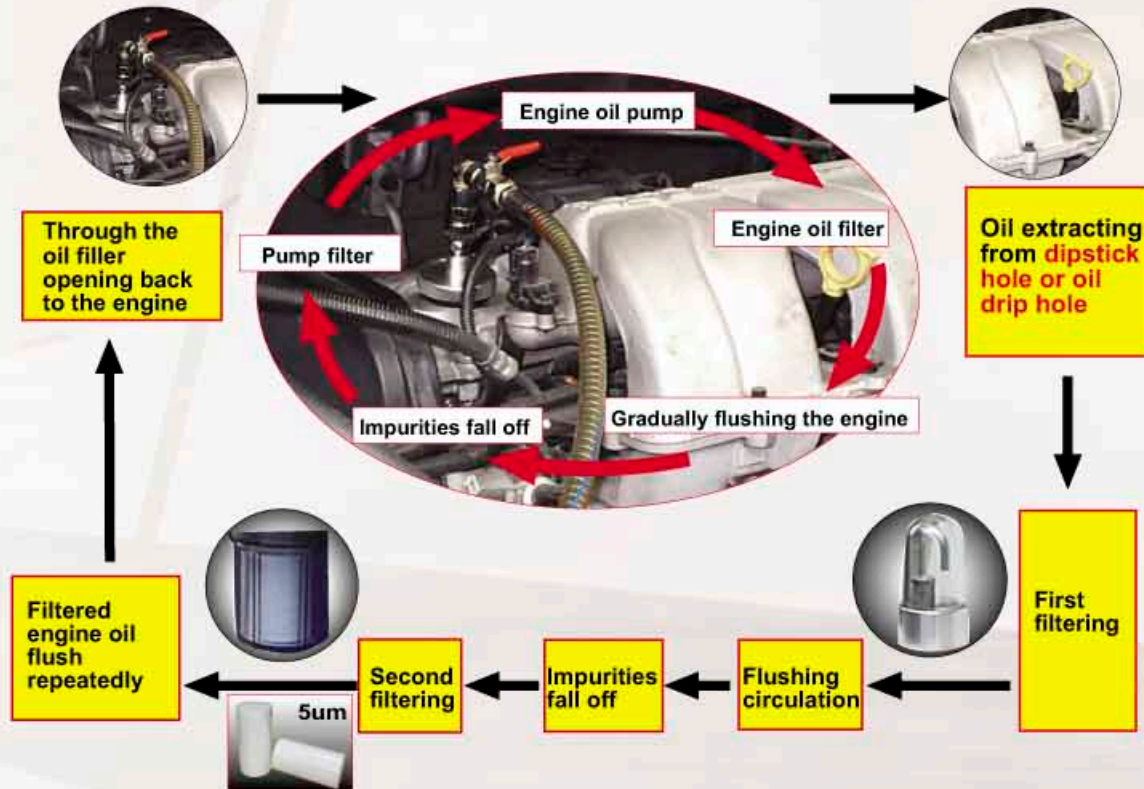

# Flushing Circulation:

Internal engine flushing + External Flushing machine filtering

Flush repeatedly, took away all the residual sludge.

All you have is a renew engine.

<< Cause NO damage on the parts.>>

## Foam Washing Machine

### Features:

- The source of power: Air Pressure.
- Adjust pressure as needed.
- The balance of the foam cleaner can be observed from the oil level indicator tube.
- Easy to operate and move.
- The tank(70L) is Stainless Steel material.

Model	HW-25C	HW-70C
Capacity	20L	70L
Used Pressure	5~7	
Power	Air Pressure	
Machine Size	320x320x930	400x400x950
Packaging	3.4	5.4'
Net Weight	21	24
Gross Weight	22	26
