

Side View Mirror

Parking Assist Mirror

Features:

Rotary angle adjustment

It is a 360 degree rotatable assist mirror.

It is applicable to all types of vehicles. Rotate the Assist to the desired angle to eliminate blind spots.

Installation

Peel off the backing paper of the adhesive and sticking it onto the desired location on both rearview mirrors.

Sit in the driver's seat and rotate the frame to adjust the angle.

Notes

It is a wide angle convex type mirror, the image formed is virtual and reduced in size.

Please note that objects in the mirror are closer than they appear.

Model:

V-212

Country of Origin:

Taiwan, ROC

Blind Spot Mirror

6x9.0cm

Features

It allows you to see the rear wheels of the car during street parking to avoid falling into a ditch or bumping into objects.

It is a wide angle convex type mirror to give a clearer view of the blind spot than the original rearview mirror.

Wide angle, large curvature.

Installation

Peel off the backing paper of the adhesive and sticking it onto the desired location on side rear view mirrors as shown in Fig. 1, or sticking it onto the rear view mirror (inside the car) as shown in Fig. 2.

Notes

It is a convex type mirror with large curvature, the image formed is virtual and reduced in size.

Please note that objects in the mirror are closer than they appear.

Model:

V-312

Country of Origin:

Taiwan, ROC
