

EXTRACTOR SLEEVE

- Raw material: Powder Metallurgy
- Hardness: HRC42-50
- Finishing: Manganese Phosphate
- Features:

- . The special design allows for a secure connection onto the rounded-off fastener to be extracted
- . The innovative patented sleeves are used with box end wrench or 12PT socket to remove rounded-off fastener
- . Don't use with pneumatic wrench/ power wrench

In narrow space, as long as H is bigger than the hight of the sleeve, it would work.
